Client Meeting

Date: September 29th, 2021
Attendees: Emily, Josh, Alex, Kyle, Niklas, Joel, Marieke, Zach, Quinn, Rasika
Absent:

Agenda:
- Milestone Requirement Questions
    - Who will be using the end product? (Users)
        - If more than two user groups how are they expected to use the software differently
        - Users: Quinn and Rasika/BC Cancer
            - They will be using the AI we develop to consolidate and go through the mismatch in our database.
            - eventually publicly available for anyone who wants to curate a large set of images from an institution
    - Functional and Non-functional Requirements
        - "While *functional* requirements define what the system does or must not do, *non-functional* requirements specify **how** the system should do it. " - https://qracorp.com/functional-vs-non-functional-requirements/
        - Functional: User requirements and product features
        - Non-functional: product properties and user expectations
- Discussion of Features
    - **1 to 1 image matching**
    - Mammograms are thought to be the same. Resolve potentially matches
        - recursively going through the mismatches > add as potential feature?
        - More focus on fine details of images?
- Discussion of Tech Stack
    - Preferably open source libraries
    - Unix machines
- When can we plan to visit BC Cancer's location to acquire access to the datasets
    - Need to complete the ethics course before we can create an account.
    - After the request for account creation is sent we can arrange a time.
    - If we need sample dataset, we can request for some public available sources
Action Items:
- Send Ethics Certificates to Quinn and Rasika > Client Liaison
